

## Pembina Valley Water Co-op

### Notification

#### Precautionary Maintenance Boil Water Advisory

BWA Notification# 5

Customers being affected: R.M. of Morris, R.M. of Roland,

Location: All services off the PVWC main line west of Lowe Farm up to Roland.

Date & Time: Wednesday, January 24, 2018 starting at 12:00 noon till results confirm boiling is no longer necessary. (approx. 24 hrs. after submission)

Reason: Complete depressurization of water piping system

In order to maintain the highest quality of service to our valued customers, the PVWC undergoes continuous maintenance to the water distribution system.

On the above date the PVWC will be completing a repair on the distribution system that will cause a brief depressurization of the water distribution system in the above areas.

Distribution depressurization can compromise the safety of the water supply.

All water users are asked to follow the boil water advisory precautions below once water service has been restored.

Please keep all service lines and connecting pipelines isolated from the PVWC main line until flushing of the main line has been completed. Our Operator on site will be in contact with your designated contact once flushing has been completed with further instructions.

PVWC Operator: Name: Luke Chouinard  
Phone #: 1-204-304-0527

To avoid purchasing bottled water, and prior to the service interruption, water users can store tap water in clean containers for drinking water purposes and should fill the bathtub for flushing water during the outage.

**All water should be brought to a rolling boil for at least one minute before it is used for:**

Drinking and ice making, Preparing beverages such as infant formula, Preparing food and Brushing teeth.

It is not necessary to boil tap water used for household purposes, such as laundry or washing dishes. Adults and older children that are able to avoid swallowing the water can wash, bathe, or shower. Younger children should be sponge bathed. If boiling is not feasible, an alternate and safe supply of water should be used.

**To avoid burn injuries from hot water**, caution should be taken. Please keep young children away from boiled water, and place kettles and pots away from counter and stove edges.

Once test results show the water is safe PVWC will immediately contact you with test results by email.

If you have any questions or concerns please contact the PVWC at 1-877-324-1931

Results are expected approximately 24 hrs after being sent in.
